INTRODUCTION

Cricket Tournament Management system is a great platform for many cricket lovers to organize the cricket tournaments. They can store, manage and display stats of their tournaments. Cricket lovers can show their talent through this software by organizing tournament among their schools, societies, companies etc.

This online cricket tournament management system allows you to create your own cricket tournament add teams, organize matches within tournaments. This system stores and provides information of teams, match fixtures, player info, tournament info etc.

PROJECT SCOPE

The Cricket Tournament Management System is divided into two modules:

Tournament Manager

a. Create Tournament.

b. Add Teams to the tournaments.

c. Add/Drop Players from Team.

d. Auto generate match schedule.

e. Insert the match stats and player scores after the end of every match, which will be displayed in view tournament module.

View Tournament

a. View all the tournament created

b. Show matches inside every tournament in order of schedule.

c. Show statistics and result of every match and individual player performance in each match.

d. Display the result of the tournament.

e. View Player/Team History.

FUTURE SCOPE OF THE PROJECT

• Mobile App can be developed
• SMS score service
• Live Scoreboard
• Featuring scores from other parts of the state
• Our website will be connected with other major websites so that international match score could be featured

KEY CONTACTS AND STAKEHOLDERS

Name	Registration Number	Phone Number

ANALYTICS

List all the analytics done in the project. Clear design and algorithms of the analytics should be specified here.

Data Involved	Inference	Uses
TOURNAMENTS	LEAGUES AND KNOCKOUTS	This gives the user options for tournament type of his choice having knockout or league rules.
TEAM INFORMATION	TEAM NAME AND ITS ID	This gives the User and Admin a summary of the teams and its major details. Also the Admin an change these details wherever necessary.
HIGHLIGHTS AND RESULTS	FIXTURES, SCORE CARDS AND SUMMARY	The admin can update fixtures, score cards and results of the match. User can view these data and give some suggestions to Admin.
PLAYER DETAILS	PLAYER NAME, POSITIONS, BATTING AND BOWLING STYLES	While creating a player the admin can set the mentioned attributes and the user can view all the players as well as players of a specific team.
FIXTURES AND SCORECARD	MATCH DETAILS SUCH AS VENUE, DATE AND TEAM DETAILS.	Each match is automatically simulated and can be also edited manually. User can view the compete scorecard after the completion of the match.

Algorithm:

Data analysis1:

- User login details are analysed
- User enters his/her login details in a php form and the entries are matched from the database
  <form class="login" method="post" action="login_form.php">
  <input type="submit" value="Login"</input>
  </form>
- If the login details are valid and correct, user gets access to the tournaments

Data analysis2:

- Match Simulation
- **if($_GET[valuetype] == "dismisstype")**
- **{**

```
•        if(!mysqli_query($cnn,"UPDATE batperformance SET dismisstype='$_GET[codevalue]' WHERE
  batperformanceid='$_GET[batperformanceid]'"))
•        {
•                mysqli_error($cnn);
•        }
•   }
•
•   if($_GET[valuetype] == "cid")
•   {
•        if(!mysqli_query($cnn,"UPDATE batperformance SET catchid='$_GET[codevalue]' WHERE
  batperformanceid='$_GET[batperformanceid]'"))
•        {
•                mysqli_error($cnn);
•        }
•   }
•
•   if($_GET[valuetype] == "bid")
•   {
•        if(!mysqli_query($cnn,"UPDATE batperformance SET bowledid='$_GET[codevalue]' WHERE
  batperformanceid='$_GET[batperformanceid]'"))
•        {
•                mysqli_error($cnn);
•        }
•   }
•
•   if($_GET[valuetype] == "runs")
•   {
•        if(!mysqli_query($cnn,"UPDATE batperformance SET runs='$_GET[codevalue]' WHERE
  batperformanceid='$_GET[batperformanceid]'"))
•        {
•                mysqli_error($cnn);
•        }
•   }
•   if($_GET[valuetype] == "balls")
•   {
•        if(!mysqli_query($cnn,"UPDATE batperformance SET balls='$_GET[codevalue]' WHERE
  batperformanceid='$_GET[batperformanceid]'"))
•        {
•                mysqli_error($cnn);
•        }
•   }
•   if($_GET[valuetype] == "fours")
```

- {
-     if(!mysqli_query($cnn,"UPDATE batperformance SET fours='$_GET[codevalue]' WHERE batperformanceid='$_GET[batperformanceid]'"))
-     {
-         mysqli_error($cnn);
-     }
- }
- if($_GET[valuetype] == "sixes")
- {
-     if(!mysqli_query($cnn,"UPDATE batperformance SET sixes='$_GET[codevalue]' WHERE batperformanceid='$_GET[batperformanceid]'"))
-     {
-         mysqli_error($cnn);
-     }
- }

- $selectquery = mysqli_query($cnn, "SELECT * FROM fixtures where fixtureid='$_GET[editid]'");

- $delres2 = mysqli_query($cnn, "DELETE FROM fixtures where fixtureid='$_GET[delid]'");

- $insres = mysqli_query($cnn, "UPDATE fixtures SET levelid='$_POST[levelid]',level='$_POST[level]',tournamentid = '$_GET[tournamentid]',teamid1 = '$_POST[team1]',teamid2 = '$_POST[team2]',venue = '$_POST[venue]',fixdatetime = '$fixdatetime' WHERE fixtureid ='$_GET[editid]'");

-

Data analysis3:

- $insres = mysqli_query($cnn, "INSERT INTO fixtures (levelid,level,tournamentid,teamid1,teamid2,venue,fixdatetime) values ('$_POST[levelid]','$_POST[level]','$_GET[tournamentid]','$_POST[team1]','$_POST[team2]','$_POST[venue]','$fixdatetime')");

-
- $qres = mysqli_query($cnn, "select tournaments.*,tournamentteams.*,teams.* from tournaments INNER JOIN tournamentteams INNER JOIN teams ON tournaments.tournamentid=tournamentteams.tournamentid AND tournamentteams.teamid= teams.teamid where tournamentteams.teamid='$arrrecteams[teamid]' ");

-
- $qtournamentteamsview = mysqli_query($cnn, "SELECT * FROM fixtures where tournamentid = '$_GET[tournamentid]' AND levelid='$arrtournamentlevel[levelid]'");
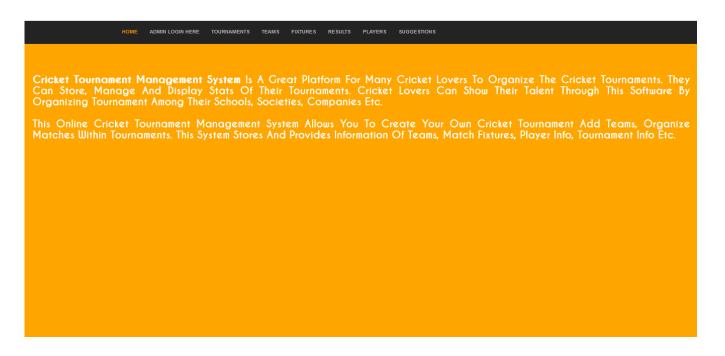

Data analysis4:

- SCORECARD
- **$sqloversplayed1 = "SELECT   SUM(overs)**
- **FROM   fixtures INNER JOIN**
- **results ON fixtures.fixtureid = results.fixtureid RIGHT OUTER JOIN**
- **bowlingperformance LEFT OUTER JOIN**
- **players ON bowlingperformance.playerid = players.playerid ON results.resultid = bowlingperformance.resultid WHERE players.teamid='$team2id'"**
-
- **$insres = mysqli_query($cnn, "INSERT INTO results (fixtureid,team1score,team2score,tossid,comment) values ('$_GET[fixid]','$_POST[team1score]','$_POST[team2score]','$_POST[tossid]','$_POST[comment]')");**
